PROFESSIONAL SUMMARY

Highly adaptable Engineer experienced in developing full-stack web applications (Next.js/React) and architecting secure cloud environments. Proficient in cloud automation using Infrastructure-as-Code (Terraform) to deploy high-availability AWS infrastructures, while ensuring robust network security through custom VPC configuration and CloudFront managed prefix lists.

WORK EXPERIENCE

Data Admin | Fillgoods Technology Co., Ltd. *Apr 2022 – Jul 2022*

- Data Extraction & Quality: Extracted and consolidated unstructured datasets from social media platforms based on specific business criteria, ensuring high data accuracy for organizational use.
- Database Management: Developed and managed structured, centralized databases to facilitate efficient data retrieval, tracking, and operational support across workflows.

Junior Programming Intern | Deena Solution Co., Ltd. *Nov 2025 – Mar 2026*

- Architected and developed a cross-platform Web Automation & Social Media Planner Chrome Extension utilizing TypeScript, Vite, and Manifest V3.
- Engineered an automated data pipeline using Google Content Scripts to extract AI-generated assets from Google Labs and sync them directly to Google Drive and Google Sheets APIs.
- Integrated Facebook Graph API to automate batch post scheduling, multi-page publishing, and real-time page performance tracking via a custom Analytics Dashboard.
- Optimized extension stability by offloading high-latency API network requests and state synchronization to asynchronous Background Service Workers.

TECHNICAL SKILLS

- **Languages:** TypeScript, Python, JavaScript, HTML, CSS
- **Frameworks & Developer Tools:** Next.js , Node.js, Vite , Docker, Git/GitHub
- **Cloud & DevOps (IaC):** Amazon Web Services (AWS), Google Cloud, Terraform, GitHub Actions, AWS SSM
- **Databases:** DynamoDB, MongoDB
- **Networking & Systems:** TCP/IP, DNS, DHCP, NAT, VPN (WireGuard/IPsec), SSL/TLS , Linux OS, VMware, Windows Server , Wireshark, Tailscale

KEY PROJECT

Portfolio Website : toey-sawatdee.me

Core Architecture

- **Frontend:** Next.js (App Router), React, TypeScript, Zustand, and React Flow.
- **DevOps & CI/CD:** Terraform (IaC), Docker (Multi-stage builds), GitHub Actions, and GHCR.
- **Cloud Infrastructure (AWS):** CloudFront (CDN), EC2, S3 (with OAC), VPC, Route 53, and Systems Manager (SSM).

Key Achievements

- **Automated IaC:** Provisioned a secure, high-availability AWS infrastructure with isolated public/private networks using Terraform.
- **Zero-SSH CD Pipeline:** Implemented a secure deployment workflow using GitHub Actions and AWS SSM Run Command to manage Docker containers on EC2 without exposing Port 22.
- **Origin Security & Caching:** Restricted EC2 access exclusively to CloudFront Prefix Lists and engineered custom caching policies optimized for React Server Components (RSC).
- **Lightweight Containerization:** Minimized production image sizes using Next.js standalone features and multi-stage Docker builds on Node.js Alpine.

EDUCATION

- Bachelor of Science in Information Technology for Digital Industry (**Second-Class Honors**)
Faculty of Informatics, Burapha University | Graduation: 2026 | GPAX: 3.40

LANGUAGES

- **Thai:** Native
- **English:** Working proficiency
